SSBC BRAKING RULESSM ELECTRIC VACUUM PUMP KIT

When using a supercharger or a big cam, chances are there's not enough vacuum being generated to operate power brakes. At least 16" of vacuum is needed at idle to properly run a power brake booster. Our vacuum pump kit will provide the proper amount of vacuum to the booster so it can operate correctly.

The SSBC Electric Vacuum Pump Kit boosts your booster with the needed pressure so your brakes are always there when you need them. And, SSBC backs your Electric Vacuum Pump Kit with a 1-year warranty.
